Notes:
- Median family income is not provided by PopStats, so 2009 median household income was used and converted to median family income using the 2000 Census ratio between family and household income.
- Extrapolated median family income data unavailable for tracts 231400, 283400, 283700, 290100, 290400, 292700, 311100, 311500, 330400, 330500, 350500, 440500, 561200, 561300, 581000, 640200, and 760900. Where Popstats data were unavailable, socioeconomic factors were interpolated from adjoining tracts.
- Figures for educational attainment represent the number of people over the age of 25 in the Census tract at the given educational attainment level. Educational attainment score based on a composite of educational attainment for the given Census tract.
- Tiers are determined by a five-factor socioeconomic score based on Census tract median family income, education, percentage of owner-occupied homes, percentage of single-parent households, and percentage of the population speaking a language other than English.
- Tiers represent equal quartiles by 5-factor socioeconomic score based on the number of school-age children in the city of Chicago.
- Summary information based on tract-level statistics excluding interpolated tracts.
